"I have learned that people will forget what you said; people will forget what you did, but people will never forget how you made them feel."

-Maya Angelou

The All Care Family Services primary goal is to maintain children and adolescents within their homes and communities. Our secondary goal is to engage all relevant systems that each client is involved with to ensure that barriers to improved emotional and behavioral health are removed. It is our experience that treating an individual within the context of their families and primary environments dramatically increases the chances of successful intervention. Research has shown that ecological factors have a much greater impact on an individual than previously thought. All Care Family Services was developed with the guiding principle that for the most part, children and adolescents belong within the ecological context of their homes and communities. All Care Family Services programs are designed to impact the multi-systemic environment in which our clients reside by utilizing a systemic theoretical foundation.
